Comments: Stop grazing of cattle and sheep Expansion!!

Protected national forestry lands, protected watershed areas....

Are just that- TO STAY PROTECTED!!

To expand cattle/sheep grazing habitat, is to ENDANGER PROTECTED FORESTED LANDS, lakes,

Grasses and untouched areas meant to be unspoiled by human endeavors!!

FS's proposed revisions would expand grazing well into unspoilt forested lands by returning grazing of animals back to the regulations of the 1960s AND our forests CANNOT SUPPORT THIS EXPANSION AND DESTRUCTION AND POLLUTION TO OUR NATIONAL FORESTS!!!

This is the OPPOSITE DIRECTION OUR NATIONAL FOREST SERVICE SHOULD TAKE!

FS needs to strengthen grazing rules/limit grazing lands....

Save our pristine forests, lakes, watersheds etc!

This is leftover Trump admin legislation!!!

Bad policies always!

Bad policy from its inception!

Forest service..., PLEASE DROP THE PROPOSED RANGELAND MANAGEMENT DIRECTIVES!

THANK YOU, CONCERNED CITIZEN LLL D
