First name: Preston

Last name: Manning

Organization:

Title:

Comments: This is obviously a government give-away plan that is designed to go against any good that is envisioned in the Wilderness Act. The Clivens in Nevada should be made to pay millions for past excessive grazing, and your plan might open up far greater areas to be trampled and ruined as Wilderness by cattle, with additional human destruction.

There should be no more destruction of wilderness by lax governmental agencies, of which you and the BLM seem to be pre-eminent.

Thank you, Preston C. Manning, M.D., Staunton, VA
