Comments: Wilderness was not protected under the last administration. Rather, private interests were catered to, like cattle ranchers.
It is time to protect habitat and animals who inhabit federal land. In so doing, you are protecting watersheds, securing best practices for land management, protecting forests from encroaching open areas, and limiting pollution from concentrAted grazing of cattle, feces runoff, etc.
Wilderness needs to be protected. That is the mission of our federal agencies. In so doing, federal land should no longer be commercial opportunities fkr private interests.
Thank you
