Title:

Comments: As you are making your decisions about these lands, please consider their value just as they are. So many areas of our world have been touched by man and are lost forever. We need to protect these last wilderness areas as if our lives depend upon it, because they do.

I encourage you to consider the next seven generations to come. What impact will the choices you make have on them? Protect us now and protect their future.

Thank you for your time and consideration.
