Comments: Anyone raising livestock needs to be able to afford to do so without assistance from taxpayers. If they cannot afford to purchase enough land for grazing and watering, then they need to find a new line of work, just like the rest of us do. Public lands should NOT be used by for-profit businesses upon which to raise their animals. Leave nature to the wild animals. Leave nature to humans wanting to enjoy the land and scenery. Let private businesses seek private funding to make their profits.
