Comments: I think its quite corrupt and quite sad that the financial interests of a couple special interests cattle ranchers with good ole boy connections to government players come before the established law to protect native species and other plants, animals and insects that call america home. Its wrong and I'm going to say so. DO YOUR JOBS and enforce and care for and make space for these non-cattle species. Nature and the wild public lands we have left aren't casinos for the well connected to pillage and profit off of. Animals have every God given right to claim our lands as home and may God strike down anyone that is a threat to animals everywhere. Thank you.
