Comments: Your schemes re livestock in Wilderness areas are just more gifts to the rich welfare ranch individuals and corporados. How many of the Forest Circus bureaucrats came from these businesses/welfare bums' employ? How many already have promises of jobs at same? How many are already on the payroll--legally or under the table?
I pose these question absolutely sincerely, because there is no other explanation for this latest attempt to sell out OUR lands and waterways to the already rich.
Wilderness Areas are precisely that: WILDERNESS, not shopping malls, not amusement parks, not feedlots, not dairy or leather factories. I was of age when the Wilderness Act was passed. It was a scandal that commercial livestock was allowed to use up and destroy natural habitats then, and the situation has only gotten worse. The "rent" of OUR lands is much worse than a bad joke; it's a stab in our backs; it is nothing more than a poorly cloaked, massive transfer of wealth from working humans to greed-head corporados and the equally undeserving rich individuals. It is desecration of nature. It must NOT be expanded beyond the current egregious theft and abuse of OUR lands. It must be stopped. Now.
If the Forest Circus can't or will not do for Wilderness and all OUR National Forest lands what it was created to do, then it should be totally disbanded, dissolved, all honchos fired, to never be rehired, and be replaced with an agency that fulfills the mandate to protect and--at the very least--properly manage OUR National Forests for EVERYONE'S sake, not just your welfare ranching/mining/piping Wall Street bosses'.
