Comments: To Whom It May Concern,
It is time to kick the welfare ranchers off public land. These conservative welfare queens need to stand by the free market they so espouse and pay market values for grazing fees. $500/head per month for grazing fees. If they can't afford, oh well... too damn bad. Public lands should be kept in as pristine condition as possible, for the environment and wildlife habitat. Welfare ranchers and their cattle just muck everything up. Get these deadbeat welfare cowboys off Public land now!
