Title:
Comments: You are taking the exact opposite action that is indicated. You should be closing vacant allotments to grazing. You should be protecting wilderness and public lands by limiting livestock grazing.
You are running counter to President Biden's 30x30 land conservation agenda. you are sacrificing protected lands to the commercial livestock industry.
Do what is ethical. Drop the Rangeland Management Directives.
I am so sick and tired of my tax dollars going to promote cattle grazing that is ravaging the planet.
