Comments: Hello,

I was a resident of Texas for 62 years, during that time I spent considerable time in the wilderness and back country of New Mexico, Arizona, Idaho, Utah and Colorado.

In these journeys I observed the vast negative impacts of cattle grazing on the land and water resources.

It is beyond me how this nation has strayed so far from protecting the people's lands. This priceless and irreplaceable resource must be protected for future generations.

Please do the right thing for our nation and protect wilderness.

Thank you
