Last name: Langston

Organization:

Title:

Comments: We need to preserve what little wilderness and biodiversity we have left. I shudder to think what kind of ravaged planet we are leaving for our children and grandchildren. Decisions should be based on sustainability and not the profit of a few special interest groups. Eventually we will have to come to the realization how much the greed of some groups will destroy the future for many! It seems that of late most of the decisions by the Forest service have benefited only a few select people and certainly not our wildlife or forests.
