Comments: To Whom It May Concern:

Increased grazing would not only fuel livestock grazing's contribution to the climate and biodiversity crises, but runs directly counter to the Biden Administration's 30x30 land conservation agenda by sacrificing what could be protected lands to the commercial livestock industry.

This is OUR land, and does not belong to ranchers. It belongs to wildlife and the natural world ecosystem.

Please urge the Forest Service to do the right thing to do for Wilderness, other public lands, and wildlife by dropping its proposed Rangeland Management Directives.

Thank you.
