Comments: I strongly oppose grazing in Wilderness areas. The land is not suitable for livestock grazing. This will stress sheep and cattle out not to mention wildlife. you can expect widespread degradation of livestock. Does that mean wildlife will be killed at the expense of livestock? Is the livestock going to be for export?

So its inferior meet and added to that degradation of tthe wilderness for ranchers to make more profit from a government agency. Disgusting.. Another agency gone over to working for ranchers.
