Comments: I strongly disagree with land rights being granted to anyone "in perpetuity". Children and grandchildren of original grantees automatically being given, albeit reduced, access to the people's land? It is shortsighted to continue these giveaways knowing the environmental damage grazing does to native species. This leftover Trump administration proposal to increase grazing would not only fuel livestock grazing's contribution to the climate and biodiversity crises, but runs directly counter to the Biden Administration's 30x30 land conservation agenda by sacrificing what could be protected lands to the commercial livestock industry. The Forest Service must do the right thing for Wilderness, other public lands, and wildlife by dropping its proposed Rangeland Management Directives.
