Comments: Rangeland Management Directives #ORMS-2514 COMMENTS
1-Wilderness Grazing MUST BE ENDED. This document looks to increase wilderness grazing. Commercial Stock Grazing significantly degrades watersheds.
2-Grazing on inappropriate drainages is encouraged by this document and again wrong. 30x30 standards please. Not 1966.
3-FS must do the right thing by land and habitats not the cattle industry. DO RIGHT - this directive ORMS2514 is outdated and must be reworked to reflect current 30X30 goals of the CURRENT administration.
