Last name: Hormel

Organization:

Title:

Comments: I will put it simply here: No grazing on public wilderness & forest service lands s/b permitted.

This "giveaway" to commercial interests does not align with the purpose of these lands, & is damaging to their environment. This is no different than permitting mining & fossil fuel extraction on these lands, which also often do permanent damage to these lands. These are NOT set aside areas for \$\$\$ making activities of private interests. They are areas to be preserved for the wildlife & overall ecology they contain.
