Comments: I along with many other Arizonans absolutely do not support this in humane action of eradicating the wild horses of the Apache Sitgreaves Natl forest. The wild horse is an icon of the west, and they have been in the area for over 100 years. I know for a fact that cattle roam free in this forest and it is such a double standard to target the horse but not the cow. There are alternatives and they need to be heard and heavily considered. The Forest Service needs a serious update on how they manage federal lands.
