Title:

Comments: Since the T**** Administration was known for its hostility to the environment, I naively hoped that once "#45" was gone, their policies would be gone also. Obviously that's not going to happen.

Sadly, the F.S. often seems to have a hard time grasping that Wilderness is supposed to be Wilderness, not a grazing area for commercial animals. I so wish you instinctively valued Wilderness, but I also understand the political pressures you live under to do the opposite. But with our growing population and climate pressures, it is more important than ever that Wilderness be PROTECTED AND VALUED. PLEASE do not do anything which puts Wilderness at right.

Thank you for an opportunity to comment.
