Comments: The wild horses in Heber are one of our States greatest natural resources. These beautiful animals have been here for hundreds of years and are part of our states heritage. People from all over the world come to see these horses in their natural habit and appreciate the fact that our State has set aside area for them to remain free. I agree darting the mares with birth control is a very viable option to help reduce herd growth and provide a more sustainable herd size. Removal of the horses away from their home, however, is cruel. Often "auctions" and "adoptions" without very careful, time consuming and costly control measures, result in a horse ending up in a very poor environment or even slaughter. Please do not support this Territory plan. You will find that thousands of people feel the same way I do and we are willing to help keep these horses free and are willing to help in any way we can. Thank you .
