Comments: Stop! Please protect these beautiful horses!

"We have plenty of land to share here with OUR Wildlife. I'm ashamed of our Forest Service here in Arizona at this point with everything that is going on. Shameful."

"The number of horses you plan to leave is too small for them to survive there and your calculations do not take in account all the land the horses use including reservation land. Please stop pleasing only special interests and do what is best for wildlife, wild places and Americans,"
