First name: Sharon

Last name: Cook

Organization:

Title:

Comments:

1) Expand the current designated HWHT to include the entire 818,651 acres of the Sitgreaves National Forest, the way it should have been done in the first place. AML, forage allocation, and everything else related to the Heber herd should be based on the "territorial habitat limits". The Sitgreaves National Forest is where the Heber wild horses have been historically known to use as their territorial habitat limits.

2) No overpopulation equals NO CULL! PERIOD!

3) No overpopulation equals NO BIRTH CONTROL! PERIOD!
