First name: Karen

Last name: Waltman

Organization:

Title:

Comments: I am so disappointed and disheartened to read that once again the population of wild horses is going to be rounded up and auctioned off, most of them ending up in slaughterhouses, because the BLM refuses to use humane methods of birth control, like PZP, to control the populations of these horses. Why does the BLM refuse to use a scientifically proven, humane way to control the numbers of these horses?? The American public loves these wild horses, and wants to see them living their lives peacefully in the wild. Every time we see images of these cruel roundups by the BLM, we become more distrusting of this organization that is supposed to be managing these lands for the American public, yet obviously is managing it only for the sake of livestock ranchers who profit from grazing their livestock on lands that belong to the American people. I oppose the grazing of private livestock on public lands, and I oppose the BLM once again rounding up these wild horses. Get with the times, use science, and humanely control these herds with PZP. These are PUBLIC lands, not rancher's lands, so do what the majority of Americans want, and save these horses.
