Comments: Please take the following into consideration before voting to destroy some of our long-standing precious Arizona heritage.
They are also the last herd in Arizona on Forest Service land that is protected by the Wild Free Roaming Horse and Burro Act of 1971. So we ask the Apache Sitgreaves Forest Service don't treat these treasures like trash!

The Heber wild horses are a historic population that merits real protection and sincere humane management by the Forest Service.

Our point is: there is a better, more sustainable, cheaper, and more humane way to manage wild horse population numbers. It is a proven safe and efficient method called PZP that can be darted in the field without capture. This is what the forest service must try first, before any extreme removals to unsustainable numbers.

Thank you for your honest consideration.
