Title:
Comments: Please stop grazing in wild lands. s. Thevoriginal authors and supporters of the Wilderness Act of 1964 wanted to end grazing in Wilderness because grazing is fundamentally at odds with Wilderness, the politics at the time wouldn't allow it. Today the negative impacts of livestock grazing are much more clearly understood, including degraded water quality and soils, the spread of invasive weeds, destruction of riparian and other important habitats, reduced forage for and displacement of native wildlife, and much more. At a time when our world is under stress due to the effects of climate change, we need to be the best possible stewards of our wild lands.
