Comments: Sadly the Federal Government again shirks its duty to preserve. You deem the horses other than wildlife therefore they aren't important and necessary. It matter little that they have existed longer than most humans in the area and harm no one nor the land. It is truly sad that you will find ways to squander tax dollars on something else that is not important while you ship these defenseless animals off to a strange land or split up their families for no reason. They should not have to loose their freedom because they bother you. As a taxpayer in this state I believe you need to reassess your responsibility to the public and our lands. You seem to be copying the rude, detrimental behavior of the BLM that is doing it's best to rid America of all wild horses. I am truly ashamed of your actions and made that you spend my tax dollars to do this!
