Comments: The FS's proposed revisions would expand grazing across our National Forests and within Wilderness by directing vacant allotments to be fully restocked and by returning grazing to the excessive levels permitted in the 1960s, despite conditions that cannot support increased grazing. This is the opposite direction the FS should take-instead of increasing livestock grazing on public lands, the agency should allow vacant allotments to be permanently closed and should protect Wilderness, other public lands, and wildlife by limiting, rather than increasing, inappropriate livestock grazing in National Forests.

Any revisions to Forest Service grazing policies should encourage and prioritize voluntary grazing permit retirement to reduce permitted livestock grazing across the National Forest system, including within Wilderness, so as to protect Wilderness, other public lands, and wildlife.

Thank you for your consideration.
