Comments: I would like to urge you to manage the heber wild horses in the new modern way to control herd size. Using pzp darting to control herd size keeps family bands together, manages size, is cost effective. We travel/camp in the black canyon area and love seeing the wild horses. Yesterday we saw a band with one foal traveling/grazing within half mile of a herd of about 40 deer living/coexisting . Please treat our horses humanely and with modern techniques. We should not be rounding up, selling, slaughtering horses. Arizona is much better than that! Pzp birth control is the way to proceed. Thank you for considering my opinion as an Arizona resident, responsible camper and forest supporter and frequent visitor to that area.
