First name: Anne.

Last name: Olivares

Organization:

Title:

Comments: Please do not disturb the Heber herd of wild horses. They have managed to stay healthy, and, have not increased their herd size as erroneous figures suggest. It is unnecessary & unhealthy to use sterilization methods for a problem that doesn't exist.

The wild horses should remain free, by law PL 92-195. Unlike cattle, the horses are not over grazing & they are not environmentally destructive.

Please do not disturb our wild horses.
