Comments: There are humane ways available to the forest service to manage the equine numbers. The forage allocation was only counted by the size of the territory, not by the actual size of the acreage where the horses roam. These horses are a historic herd protected by federal law. They bring Arizona and the local communities income and recreation. And last but not least, these are our public lands in which the opinion of the public should matter most. WE, the public, want you to leave the Heber horses alone. Thank you.
