Comments: Sounds to me like if they find minerals, etc. there then they will apply for mining permits. THAT I oppose. This is a wonderful area and I would truly hate to see mining done here. Besides being so close to Mammoth, it's in a natural state which can never be replicated once these things are done to the Earth. And even trying to fix it after the initial boring is still not good - will take years & years for the seedlings to grow!!! So I'm against this. We love this area as it is!!
