Title:

Comments: You need to bow to and support the Natural flow not Man's whim. We collectively have seriously damaged Natural patterns to the point of strangling the Earth's ability to manage - us. The horses and burros are NOT feral, they DIDN'T escape, they are BORN on the land and support the Earth in ways Man hasn't even begun to fathom. Man planted livestock take away from the wild animals and our one and only living planet. It's past time all of us come to the realization of what they BEFORE WE ELIMINATE THEM which includes reducing the numbers below their Natural ability to stay healthy. Manage the people not the horses and burros. LEAVE THEM ALONE.
