Comments: I'm am against removing or in any way altering the herds of wild horses. There are numerous humane ways to manage wild horse numbers removing them should be the LAST resort. These horses are have been here wild and free, they are historic and are protected by law. We enjoy seeing these horses and when company comes we always bring them out to see them. We spend money to get there, to stay around that area so having these horses remain brings income to the area. There are herds right now being managed humanly with birth control and recognizing the actual acreage that they roam. Please do not remove any of these horses they are on public land and we "the people" want them there.
