Comments: The planned reduction of the wild horses should not be allowed. Reducing the population to such a low figure decreases genetic diversity. Also what do you plan to do with the hundreds of animals you round up..slaughter them, sell them.. What happens to the ones that aren't adopted or sold to feed lots??? Are they destined to stay in pens, separated from family members. This costs taxpayers. Please don't do this. Work with the organizations that help the wild horses bands, work out some kind of birth control with these groups. Wild horses are part of American fauna, they deserve to be maintained. Thank you
