Title:

Comments: To whom it may concern,

The Eastern Sierra is one of the most magical places I have lived. I love looking out my windows at my house and along my commute and seeing the rise of mountains, wildlife, and the seasons as they change. I moved here because of the beauty and recreational opportunities of the eastern Sierra. I truly feel like this is my home.

I do not believe this mine is in the best interest of the public. Mines like this are ugly, toxic to the local communities, and offer nothing but an eye sore to the local economy. This company just wants to exploit the natural resources here and once they are done, move on to another location to rear the resources and leave the government with super fund site to deal with in a few years.

Do not approve of this mine,

Savanna Deger
