First name: Judy

Last name: Bonshire

Organization:

Title:

Comments: Please leave our wild horses where they belong, on the public lands they have roamed for many decades. There are humane and less costly ways to manage their population than cruel roundups that separate their families and will send many of them to slaughter pens. They are federally protected. They are a huge part of our western heritage. They belong to the land as much as the land belongs to them. Leave our horses alone.
