Comments: Hi, I am a concerned citizen who live in Arizona and would love to see these horses being protected and humanely managed. Arizona is famous for her natural beauty and her unique wilderness that is inviting and engaging. Many of our residents, as well as many out-of-state visitors, hike and tour our parks and trails purely because our state is not only beautiful but also accessible. I know many people that visit the Salt River for the famous wild horses. I imagine allowing the Heber wild horses to continue to live in their territory could be considered mutually beneficial. It would be obvious what the horses could benefit from. For us, it would be economic benefits. They could become a attraction for animal and nature lovers, and bring in dollars to local businesses. I hope the entities of state and county overseeing these Heber wild horses would agree that preserving the presence and thoughtfully managing of the horses could be a good thing. Thank you for your consideration.
