Comments: I as a taxpayer and a person who supports wildlife I am adding my comment and stating that I am against you're Roundup of these wild horses they do not cause a problem the problem is with the cattle ranchers who want to destroy public lands I the taxpayer I pay for these public land and I am the one as many other taxpayers who may be unaware have a say in how these lands are managed and these wild horses are part of it and need to be left alone there are other very successful options available such as the one used by the Salt River horse Management Group where they use birth control in the mares which will definitely have an effect in keeping the numbers down but this Roundup is brutal an unnecessary and I am sending my objection demanded an alternate method be used
