Comments: I am opposed to the Heber Wild Horse Territory Plan as it currently stands. In particular I am opposed to the idea that allows as few as 50 horses on nearly 20,000 acres of public land! Meanwhile, the agency permits thousands of cattle to graze within the horses' habitat. These lands belong to all the American people, not just the local cattle ranchers!

Besides prioritizing a special interest over the wild horses and burros, maintaining the population at only 1 horse per 394 acres would adversely affect the health of the herd. But if any fertility control measures are deemed necessary, PZP should be the preferred tool. IUDs are not humane in free-roaming herds, and should be eliminated from further consideration.
