Comments: Sirs,
I have read the information and while I understand that you do not wish respondees to quote or closely paraphrase, I have to say that I agree with the opinions contained in the list of comments that pertain to the preservation of these family bands of wild horses. Congress has mandated their protection. First, remove cattle as they do more damage to the environment. Let the horse help control the grass as to reduce firefuel.

Culling horses by helicopter is inhumane and cruel. These wild animals are apart of our natural inheritance.
Thank you

Respectfully submitted, Reita Newkirk
