Title:

Comments: As the ex-wife of a Forest Service Employee, I lived in the forests of California for nearly thirty years. We raised our children at Ranger Stations scattered from the Angela's to the Stanislavsky. I know and love even the most barren lforest land and certainly the Inyo has its share.

I know you must hold hearings and take comments so here is a bit NO to this project.. The tailings and damage from mining marred the land around Orville for over a hundred years.

Please count me as a voice against this project.
