Comments: I vehemently opposed to inhumane round ups of burros & horses from their native ranges that is unnecessary & fiscally irresponsible & reduce the numbers so low that they will not be able to sustain a diverse gene pool when there is plenty of grazing for both horses & cattle. Proven, humane & fiscally sound measures MUST be used. I oppose the use of IUD's, as in humans, there are too many issues that are not worth the risk of continued unsuccessful use. Horses found outside of the Territory deserve to moved back inside the Territory boundaries. Any removals that occur within the Territory, need to be spread out over time so horses don't extremely out number adoptions. Illegal hunting is same as poaching & equally appalling. People that do this are CRIMINALS & need to be held accountable.
