Comments: Please don't remove our wild horses from their home and split up their families. The BLM corrals are already full from all the roundups you have hundreds and hundreds of horses sitting in corrals that should be out roaming on their range. None of the mustangs that have been removed from any state are ever undernourished and horrible shape there's plenty for them to eat and drink. And there's still plenty of room for all of the cattleman's cattle to graze with the wild horses. Are wild horses and donkeys should be protected as always nothing should ever change.
