Comments: Let's look at the numbers (\$\$) shall we? I would like to see a cost break down on what is being spent catching these horses. And the cost to remove them along with the cost of providing for their care; put up against the monies made from grazing allotments along with the expenditures for such items as fencing and irrigation piping necessary for livestock grazing on federal lands.

Oh, you don't have that information... is it because these actions make no sense and are a complete waste of taxpayers dollars and cannot be justified?
