Title:

Comments: why do you give us this little site to comment? its insulting. the public is govt by the people for the poeople. this is a proposal to massacre horses. get the dam cattle off our national lands now. shut down leases with robber baron cattle ranchers whose catle destroy our public lands. we dont want to rent to robber baron cattle ranchers. their ilk can be seen in clive bundy. stop all leases with cattle ranchers. no fertility control should be put on these poor animals that profiteers love to kill. this is wild horses territory on our national lands and mllions of american wants these horses fully protected from slime like the blm agency who are about killing animals and turning any gods vegetatin or creatures into money to put into their pocket. this is just a pure slime proposal that needs shut down.
