Comments: Hello , I am involved with SRWHMG , although I'm fairly new to this group I have nothing to say but good positive things they (now we) are doing to keep the wild horses safe and free! The humane approach in keeping the numbers of births down speaks for itself. The system that has been developed is effective and efficient in keeping track of every single horse on the salt river. I know we can help the Hebert horses to!!!!! It's their land and not their fault that they need help being managed so that maybe u can see they to can let the passionate people who like we all do pride ourselves in keeping these iconic creatures free and safe. Please reconsider the round up , it's not fair to the horses, or to the people who have thus far supported , and put time and energy into keeping the horses wild, safe , and free. I hope for the sake of the horses that their lives will be reconsidered w a heavy heart. ??. Thank u for taking the time to hear my thoughts!!
