Title:

Comments: Stop KORE Mining exploration in Long Valley. Impacts of this proposed project would harm our local quality of life, tourism, air quality, noise pollution, decimated habitat of local flora and fauna (including endangered sage grouse and local deer).

Furthermore, if KORE finds a sufficient quantity of gold to mine, that activity could affect important habitats, create long lasting water pollution issues, and forever scar Long Valley.

We don't need gold. We need a healthy environment, clean air and water.
