Title:
Comments: Please stop the wild horse roundups altogether. They are government sponsored animal cruelty. The way the horses are treated during and after roundup is absolutely horrific.

The number of horses you plan to leave is too small for them to survive there and your calculations do not take into account all the land the horses use, including reservation land. Please stop pleasing the ranching and other special interests and do what is best for wildlife, wild places, and the taxpayers who own the land.
