Title:

Comments: To Forest Service

Please do no Action with the Herber horses No cull no birth control.

There is no proof of overpopulation. Therefore there is no reason for a cull. There is no reason for PZp Gonacon or any other birth control. There should be less cattle and more horses. The law explicitly stated that all management activities shall be at the minimal feasible level. Since overpopulation has never been proven marching in with bait traps and dart guns is violation of the law.

A full scientific study which would include the impacts of all use in the forest including cattle grazing and the impact of human element on the Sitgreaves Nat. Forest needs to be conducted.

EIS needs to be required due to magnitude of the management plan and significant impact on the environment.

The EIS is required pursuant to Nat. Environment Policy Act.

Please let the Herber horses stay.

For the wild horses

Rebecca Falk
