Title:

Comments: There is NO proof of overpopulation.

Therefore there is no reason for a cull.

And there is no reason for PZP, GonaCon or other birth control measures.

The law explicitly states " All management activities shall be at the minimal feasible level..." Since overpopulation has never been proven, marching in with bait traps and dart guns is in violation of the law.

I support NO ACTION. There should be a full scientific study which would include the impacts of all use in the forest including cattle grazing and the impact of the human element on the Sitgreaves National Forest.

There should be an Environmental Impact Statement (EIS).

Due to the magnitude of the management plan and significant impact on the environment an EIS is required, pursuant to NEPA (National Environmental Policy Act).
