Title:

Comments: This travesty needs to be addressed, and those who are not protecting our native wild horses on the land they belong need to be replaced ....inappropriate actions have happened and those persons need to be held accountable. This land has been occupied by these magnificent animals for hundreds of years and the greed and misappropriation of the land to cattle farmers is the threat. Please do not allow more of our history to be wiped out because of the greed this country has allowed to destroy everything good, everything beautiful.
